## TOP TIPS FROM THE SHOW'S EXPERTS

### Gun Mounting Tips By John Bidwell.

Don't let your Gun Mounting let you down! It's always easier and more accurate to bring the gun up to the line of a target than to lose sight of the target under the barrels. This technique works best with the rabbit. Beware of slow targets which come to a virtual stand still overhead. They encourage the shooter to shift his weight to the back leg and lift his head from the stock in the process.

Firstly, win a family ticket (for either day of the Fair) by tackling our online Treasure Hunt. Surf the web, solve the clues and enter the prize draw! Secondly, at the Fair itself, whilst exploring the stands and attractions, successfully identify and solve the hidden clues!
